Brief introduction to requirements for trade with organic products

according to the European Regulation (EC) 834/07*, the US National Organic Program (NOP), and JAS

1. **Organic traders:**
   - Must assure traceability and transparency
   - Need a good documentation system
   - Must have a good risk management
   - Should look for long lasting business partnerships, instead of just buying and selling on the spot market.

2. **Who needs to be certified as organic trader:**
   Different interpretations exist in this regard:

<table>
<thead>
<tr>
<th>Certification required according to…</th>
<th>EU-Regulation</th>
<th>NOP</th>
<th>JAS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Customs agents who do not become owners of the product</td>
<td>No</td>
<td>No</td>
<td>No</td>
</tr>
<tr>
<td>Brokers who only establish business contacts, but do not become owners of the product</td>
<td>No</td>
<td>No</td>
<td>No</td>
</tr>
<tr>
<td>Traders of packed products who buy and sell the product, without repacking or relabelling it</td>
<td>Yes</td>
<td>No</td>
<td>Only if they perform the &quot;grading&quot; on behalf of the final processor</td>
</tr>
<tr>
<td>Traders of unpacked bulk products</td>
<td>Yes</td>
<td>Yes</td>
<td>Yes</td>
</tr>
<tr>
<td>Handlers who repack or label the product</td>
<td>Yes</td>
<td>Yes</td>
<td>Yes</td>
</tr>
</tbody>
</table>

3. **Origin of organic products:**
   - Exporters must be sure to hold copies of valid organic certificates and other relevant documentation from all their suppliers (for details, please refer to CERES “Brief Info Reception Procedure”)
   - Only products from EU certified suppliers can be sold to the organic EU market, while products for the US market must be NOP certified, for Japan JAS certified
   - Risk management: if you suspect that a product that you intend to buy and/or sell as "organic", might actually not comply with organic production rules, then it is your obligation as a trader to double check, e.g. through:
     - Cross checking with CERES and the supplier’s certifier
     - Residue testing
     - Additional supplier audits, etc.
     If your doubts persist, you should refrain from buying/selling the product as "organic". Please inform your certifier about your findings regarding the supplier!
   - Co-operation with suppliers who are not trustworthy, should be discontinued
   - It is good practice to always ask for a transaction certificate for any purchase of organic products, even inside your country.

4. **Traders who repack or label:**
   - Actually, packing or labelling are considered as "processing" operations (NOP calls this "handling"); for this reason, traders in this category should refer to our "short information for processors".

5. **Traders who do not pack or label:**
   ✓ Traders in this category must fulfil all requirements under points (5), (6), and (7) of our "short information for processors", concerning documentation, traceability, and labelling.

6. **Export from third countries to the European Union:**
   ✓ **Certifiers** for all entities involved in the supply chain (farmers, processors, traders), must be listed by the European Union in Annex IV of **Regulation (EC) 1235/2008** for the respective country.
   ✓ A "certificate of inspection" (**transaction certificate**) must be issued by the exporter’s certifier for each shipment to the EU. This document must be presented in original to the customs control at the point of entry to the EU. Please refer to "Brief Info 3.2.8.1 on TRACES.

* **Note:** Inside the EU, the Regulation must be applied in its strictest sense. For the time being, products in third countries outside the European Union can be certified only as "equivalent to", not as "compliant with" Reg. (EC) 834/07. For further details, please see the CERES Policy on Third Country Certification.

Please be aware that this is only a selection of essential requirements of the organic standards, meant as an introduction. The operator, of course, must learn about and meet all requirements of the respective standard.
